WORLD WATER DAY 2019 – March 22

The United Nations observes March 22 each year as **global World Water Day** to focus attention on the importance of freshwater and advocating for the sustainable management of freshwater resources. The theme in 2019 is **Leaving No One Behind**. The goal is to have water for all by 2030. Today, billions of people are still living without safe water. Women, children, refugees, indigenous peoples and disabled persons are struggling for access to the safe water they need. Premier Associates & creative family members are encouraged to submit photos, drawings or other original art to display at the office on this day. Details to follow.
