

Ophthalmic Injections	Original Effective Date:	01/01/2020
Corticosteroid	Most Recent Review Date:	09/21/2023
Neurotoxin	Latest Revision Date:	09/21/23
Antimetabolite		
Complement Inhibitors		

Scope: Guidance applies to various injection modalities of corticosteroids (macular edema), neurotoxin (spastic/muscle disorder), and antimetabolites (scarring) for the treatment of ophthalmic disorders.

Approval Process:

- A. **Medical Director approval required for the initial injection. Non-clinical team members may approve prior authorization requests for subsequent injections** when the request includes the same CPT code, same drug, and same diagnosis as the initial request approved by the Medical Director. Non-clinical team members will check member eligibility and injection frequency per table below prior to issuing prior authorization.
- B. **Medical Director approval is required if the prior authorization request does not meet above criteria.**
